PET ADOPTION PLATFORM

Connecting adopters, shelters and administrators on a single platform

OVERVIEW

- Pet Adoption Platform is a centralized web-based application that simplifies and organizes the pet adoption process.
- Connects adopters, animal shelters and administrators through a single platform.
- Adopters browse pets, submit adoption requests, pay online and choose a delivery method.
- Shelters manage pet information, process requests and update transportation status.
- Administrator verifies shelter accounts and oversees overall platform integrity.

OBJECTIVES

- Reduce manual communication between adopters and shelters.
- Improve accessibility to pet information.
- Provide organized adoption records.
- Support secure role-based access.
- Enable online payment for adoption.
- Coordinate delivery and transportation within the platform.
- Provide a transparent workflow from pet selection to delivery.

EXISTING SYSTEM

- Manual communication
- Paper-based adoption records
- Scattered pet information
- No online payment
- Unclear adoption status

PROPOSED SYSTEM

- Centralized digital platform
- Searchable pet listings
- Online adoption requests
- UPI payment with confirmation
- Delivery scheduling & tracking
- Role-based secure access

CORE FEATURES

Pet Browsing & Search

Adoption Requests

Shelter & Pet Management

Online Payment (UPI)

Role-Based Access

Delivery & Scheduling

MODULES

Adopter

Shelter

- Register (verified by Admin); manage rescue pet listings
- Review & process adoption requests (approve / reject)
- Schedule handover date & update live transit status

Administrator

- Verify & approve / reject shelter registration accounts
- Audit pet listings, monitor adoptions & platform inquiries

DATABASE TABLES

Users

- User ID (PK)
- Name & Phone
- Email & Address
- Role (Adopter/Shelter/Admin)
- Approval Status (Shelter)

Pets

- Pet ID (PK)
- Name / Breed / Age
- Gender / Vaccinated
- Description
- Shelter ID (FK) & Status

Adoption Requests

- Adoption ID (PK)
- Adopter ID & Pet ID
- Request Status & Date
- Flat Rs. 500 Fee / Refund

Payments & Transport

- Payment Method (UPI/COD) & Payment Status
- Delivery Method (Locked)
- Scheduled Date & Time
- Transport Status (Shelter)

TECHNOLOGY STACK

- Frontend ----> HTML5, CSS3, JavaScript, Bootstrap 5.3
- Backend ----> Python 3, Flask, Werkzeug
- Database ----> SQLite3 (Relational Database)
- Payment ----> UPI (Online Payment) & Cash on Delivery (COD)
- Tools ----> VS Code, Git & GitHub, DB Browser for SQLite

FUTURE ENHANCEMENTS

- Mobile application for adopters and shelters
- Real-time notifications for request and delivery updates
- Multiple payment gateways
- Pet health records & vaccination tracking
- Reviews and ratings for shelters
- Enhanced security and analytics dashboard

THANK YOU
